

**Designed to Produce Around 50-150 MM
Rubber Chips in Around 10-12 Tons per Hour**

90 P- SERIES PRIMARY SHREDDERS SPECIFICATION SHEET

INTRODUCTION

The finest illustration of contemporary engineering and technology in the recycling industry is the **FABHIND** Dual-Shaft **FAB-90 P Primary Shredder**. Every shaft has its own motor, which drives it and produces a lot of torque at low speeds, giving it plenty of power. The Fabhind Dual-Shaft FAB-90 P Shredder is a custom-built, multifunctional device that can be used for primary shredding in situations where output size variances are acceptable, data destruction, and size reduction of large garbage. The thickness of the knife determines the output size, which is made up of "strips" with diameters ranging from 50 mm to 60 mm.

APPLICATIONS

- Passenger & Truck Tyres
- Municipal Solid Waste
- Electronic Waste
- Metals & Appliances
- Steel Drums
- Baled & Bulky Materials
- Woods/ Pallets
- Mixed & Bulky Waste

FEATURES

- High Throughput** - Low Power Consumption Drive Design
- Specially Designed Knives** - With Hard Face & Re-Grind Multiple Times For Low Cost Operations
- Specific Stop/Auto Reversal Feature** - Protects Against Overfeeding & Damage By Unsuitable Material
- Output Size** - Can Be Easily Controlled
- Inlet & Outlet hopper** - Highly Customized

**SUITABLE FOR MOST DIFFICULT
SHREDDING APPLICATIONS**

PRIMARY SHREDDER – FAB-90 P
